## Painless Management Solutions

### ***Monitor Key Performance Indicators***

Payers, Revenue Cycle, Reimbursement, Receivables, Cash Flow, Lag Times, Claims, Productivity, and much more.

### ***Create Ad-Hoc Solutions***

Easily create reports, charts, dashboards, binders, exports, and mail merges using the built in data marts and wizards.

### ***Alerts for Critical Data Conditions***

Spotting missing data, identifying coding errors, and validating payer reimbursement are just a few examples.

### ***Automate Repetitious Tasks***

Daily, weekly, monthly, and yearly projects can be grouped into organized tasks for scheduled or on-demand execution.

### ***Distribute Solutions Efficiently***

Scheduled or on-demand distribution of information solutions in flexible formats dramatically increases efficiency.

### ***Integrate External Data***

Link any external data source i.e. (EHR, AP, PR, Inventory, etc.) to create even more information solutions.

Practice Management systems contain a wealth of information, but fall short when you try to retrieve, understand, and manage your practice. **BridgelT®** was designed to enhance existing PM systems with comprehensive management solutions.

***License and support plans to fit any budget and expertise***
